

Study Tours: Inspiring Places

Join colleagues on the morning of the Sunday, 16th of July for international benchmarking study tours of some of Austria's most impressive healthcare facilities and iconic architectural buildings.

There is no better opportunity to complete a memorable congress than to join friends and colleagues on the Design & Health Study Tours, which will be held on the morning of Sunday, 16th of July. This year, thanks to our local partners, there are two very impressive latest projects of hospital and elderly care facilities to visit and enrich your knowledge of design, health planning and service delivery in Vienna and Austria.

To register for a tour, please visit the Congress registration desk.

Return to Hilton Hotel

Nursing home „Rudolfsheim-Fünfhaus“

The nursing home Rudolfsheim-Fünfhaus (also called Ingrid Leodolter Haus) is one of the newest nursing homes in Vienna, that came into existence through the geriatric reform in September 2015. The home provides care facilities for 324 patients. All single and twin rooms provide a bathroom and a barrier-free balcony or loggia. Medical and nursing care is available around the clock. The nursing home offers short-term and long-term care as well as care of people suffering from dementia.

Vienna North Hospital, 1210 Wien, Brünner Straße 68

Vienna North Hospital is an important step in reconstructing the Viennese hospital landscape. The hospital will be one of seven specialized hospitals in Vienna. Establishing a partly new set of priorities in the other hospitals combined with shifting existing hospitals and departments from their present location to the Vienna North Hospital is improving the health care services significantly.

The new hospital provides a light flooded atmosphere as well as an optimal solution for the workflow and organizational processes. The design combines the advantages of a pavilion-type hospital with those of a central hospital. The modular expandability ensures the state of the art for many years. The invitingly shaped foyer area featuring a spacious piazza connects the hospital with the urban space while at the same time providing optimal protection against noise on account of the building's position.

The rooms are designed exclusively as single and twin rooms, which reflect the high standard finish of the inpatient wards. Light-flooded atriums, roof gardens and extensive green spaces combine to make the hospital an oasis of well-being for patients and employees alike. The landscape design unites the ideas of well-being, healing, growth and recovery in a holistic overall concept. The overall concept provides clarity, optimal functional processes, a clear organization, short distances for the nursing staff to get to the patients, and complex networks. The 800-bed hospital will unite state-of-the-art standards with as much comfort as possible.

The guided tours through the “Krankenhaus Nord” and the “Pflegewohnhaus Rudolfsheim-Fünfhaus” are a service of the City of Vienna and the Vienna Hospital Association and are free of charge.
